ACF-ORR Web API

Background

This API enables automated data exchange between ACF's Tableau dashboards and the PSC WorkSmarter platform, supporting real-time monitoring of grantee records. It adheres to HHS interoperability standards (HL7 FHIR).

User Access

The web API uses OAuth2.0 connection. Therefore, users must create an integration of type OAuth2.0 on their end.

Connection Requirements

web API	OAuth 2.0
Client ID	This information will be provided to the client by the WorkSmarter team when your access is established.
Client Secret	This information will be provided to the client by the WorkSmarter team when your access is established.
Token Request Endpoint	Production: https://worksmarter.appiancloud.us/suite/authorization/oauth/token Test: https://worksmartertest.appiancloud.us/suite/authorization/oauth/token Development: https://worksmarterdev.appiancloud.us/suite/authorization/oauth/token Staging: https://worksmarterstage.appiancloud.us/suite/authorization/oauth/token
Endpoint URL	Production: https://worksmarter.appiancloud.us/suite/webapi/getACF-ORRGranteeRecords Test: https://worksmartertest.appiancloud.us/suite/webapi/getACF-ORRGranteeRecords Development: https://worksmarterdev.appiancloud.us/suite/webapi/getACF-ORRGranteeRecords Staging: https://worksmarterstage.appiancloud.us/suite/webapi/getACF-ORRGranteeRecords

Data Parameters, Fields, and Types

Parameter Name	Type	Required	Request Type	Notes
startIndex	Integer	Yes	GET	Due to size limitations, the calling application may need to make multiple calls to the API to retrieve all records. The startIndex field will be used to indicate which record to start with while called via loop.
batchSize	Integer	Yes	GET	The number of records to return in each pull. The maximum size is currently 1000 records.
